

WELCOME TO THE BOOTHBAY REGION

I would like to take this opportunity to welcome you to the Boothbay Region Water District. The District was formed in 2002 as an amalgamation of the former Boothbay Harbor Water System and East Boothbay Water District. The District provides service to an area including Boothbay, Boothbay Harbor, Southport and many harbor islands.

There are 9 professionals employed by the District that produce and deliver safe, clean drinking water to all of our 2700 plus customers. The District staff possesses many Class IV Technicians making it one of the very most professional work forces in Maine.

If you are visiting the Boothbay region you can count on the Boothbay Region Water District to serve the very best water anywhere.

Thank you,

Jonathan E. Ziegler
